

Varsha Singh Chouhan

Full Stack Developer | Java Backend Developer | MERN Stack Developer

varshachouhan0410@gmail.com | +91-6267096668 | github.com/varshasingh04 | linkedin.com/in/varshasingh04 | Raipur, Chhattisgarh, India

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student at MATS University with backend internship experience at Paladin Educators LLP, where I built production payment-confirmation APIs in Java and Spring Boot. Skilled in Spring Boot microservices, MERN Stack, React Native, RAG pipelines, and event-driven architectures. Independent developer of an AI-powered Android business card scanner (Vamra, Play Store submitted) and three other production projects spanning full stack, AI, and LLM applications. Seeking fresher or internship roles in Full Stack, Java Backend, or MERN Stack engineering.

TECHNICAL SKILLS

Languages: Java (Core and Advanced), JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Backend: Spring Boot 3, Spring MVC, Spring AI, Spring Security, Spring Data JPA, Microservices, Node.js, Express.js, Apache Kafka, REST APIs, JWT Authentication, Webhooks

Frontend and Mobile: React.js 18, Next.js 14, React Native, Expo, Redux Toolkit, Tailwind CSS, Axios, Chrome Extension API (MV3), Shopify CLI

Databases: MongoDB, MySQL, PostgreSQL, Redis, Pinecone Vector DB, Hibernate ORM, Mongoose ODM, SQLite

Cloud and DevOps: AWS (EC2, S3, RDS, CloudFront, Lambda), Docker, Docker Compose, GitHub Actions CI/CD, Git, Linux, Maven

AI, LLM and RAG: LangGraph, Spring AI, OpenAI GPT-4o API, OpenAI Whisper API, Google Imagen API, Pinecone Embeddings, RAG Pipelines, Vector Search, OCR

Testing and Tools: JUnit 5, Mockito, Postman, Swagger / OpenAPI, IntelliJ IDEA, Lombok, MapStruct, Jira

EXPERIENCE

Paladin Educators LLP

Aug 2025 - Oct 2025

Backend Development Intern (Java, Spring Boot)

Remote, India

- Built and shipped the Payment Confirmation Module for the company's e-learning platform using Java 17 and Spring Boot 3, processing live course-purchase webhooks from Razorpay and Stripe.
- Designed a secure webhook handler with HMAC signature verification, idempotency checks, and replay-attack protection, preventing duplicate enrollments on retried payment events.
- Modeled Payment, Enrollment, and AuditLog entities in MySQL via Spring Data JPA and Hibernate, enforcing transactional consistency between payment status and user-enrollment updates.
- Wrote unit and integration tests with JUnit 5 and Mockito, raising coverage on the payment module to 85%+ and catching three production-blocking edge cases before release.
- Collaborated with senior developers in an Agile workflow using Git, GitHub, Jira, and code reviews, and documented all endpoints with OpenAPI / Swagger for the frontend team.

Vamra - AI-Powered Business Card Scanner Android App

Feb 2026 - Mar 2026

Founder and Lead Developer (React Native, Expo, GPT-4o)

Play Store submitted, in review

- Led development of an Android app that scans business cards via camera and uses GPT-4o to extract name, phone, email, company, and role into structured contacts in under 4 seconds.
- Implemented a website-to-contact parser that fetches a URL, summarizes the business in plain English, and auto-tags the contact with keywords for instant searchability.
- Designed a natural-language search feature letting users find contacts by phrases like "marketing folks I met in April" using semantic keyword matching over local SQLite storage.
- Added a reminder system with offline-first sync and push notifications via Expo, enabling follow-up nudges without server dependency, and submitted the app for Play Store review.

PROJECTS

VirtualFit AI - AI Virtual Try-On Platform and Photo Studio

Jan 2025 - Apr 2025

Next.js, Spring Boot, Python FastAPI, Google Imagen API, Chrome Extension MV3, AWS S3, Razorpay, Redis

- Cut photoshoot costs by 80% for 50+ pilot startups via a Shopify Extension using Node.js and Google Imagen API to generate studio-quality 2K catalogue images.
- Built a Spring Boot credit-ledger microservice with Razorpay integration and Redis quota enforcement, sustaining 200+ concurrent users with zero throttling failures.
- Shipped a Manifest V3 Chrome Extension delivering sub-3-second AI try-on renders on any e-commerce site via AWS S3 uploads and a FastAPI compositing backend.

LendingGPT - RAG-Powered Loan Document Intelligence App

Oct 2024 - Dec 2024

Java, Spring Boot, Spring AI, LangGraph, Pinecone Vector DB, OpenAI GPT-4o, React 18, AWS S3, Docker, Maven

- Reduced loan document comprehension time from 3+ hours to under 8 minutes (30 test users) via a multi-step LangGraph RAG pipeline that chunks PDFs and grounds GPT-4o answers in Pinecone.
- Improved answer accuracy to 91% on a 200-question loan FAQ benchmark (vs. 61% keyword search) via a hybrid retrieval strategy combining dense Pinecone vectors with BM25 re-ranking.
- Built a React 18 multi-document chat interface with session-scoped Pinecone namespaces enabling simultaneous comparison of 5 loan offers with per-source highlights.

PawVerse - AI-Powered Dog Community Platform and Pet Services Finder

Apr 2024 - Jun 2024

MERN Stack, Spring Boot, OpenAI Whisper, GPT-4o, Google Maps Places API, AWS S3 and CloudFront, Redux Toolkit, Razorpay

- Reduced blog publishing time from 2+ hours to under 5 minutes for 40+ beta users via an AI pipeline using Whisper for transcription and GPT-4o for SEO optimization.
- Achieved 92% listing accuracy across 500+ pet service providers by integrating Google Maps Places API with a Spring Boot verification and deduplication microservice.
- Delivered a 98 Lighthouse mobile score via React lazy loading, Sharp.js compression, and CloudFront CDN, cutting first contentful paint from 3.8s to 0.9s.

EDUCATION

Bachelor of Technology, Computer Science and Engineering

2022 - 2026

MATS University, Raipur, Chhattisgarh, India

- Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming.
- Final-year student. Expected graduation 2026. Open to fresher roles and internships immediately.

CERTIFICATIONS AND ACHIEVEMENTS

- Java Programming Masterclass, Udemy - 100+ hours covering Core Java, OOP, Collections, Concurrency, and JDBC.
- The Complete MERN Stack Developer, Udemy - 80+ hours covering MongoDB, Express.js, React.js, and Node.js with REST API design.
- Solved 100+ Data Structures and Algorithms problems on LeetCode across Arrays, Trees, Dynamic Programming, and Graphs.
